

Become a Heal Somerset site supporter

Join us as a partner in our flagship Heal Somerset project

The heartwood of the Projects for Nature initiative is corporate partnerships driving positive change. We are excited to offer aligned businesses the chance to join an exclusive group of supporters dedicated to nature recovery at our flagship Heal Somerset site.

This opportunity allows your company to support a cause that resonates with the growing global focus on nature-positive action and environmental sustainability.

By becoming a supporter, you will not only contribute to ecological restoration but also be recognised as a thought leader in nature and climate action. This partnership offers a unique platform for your company to demonstrate its commitment to nature recovery, reinforcing your brand as one that values the planet and its future.

You can support at one of four levels, **Earth, Wind, Water** and **Fire**:

Earth: a foundational level of support, grounding the initiative

£10,000 per year for up to four supporters

Wind: a commitment that enables us to embrace change and adapts to new challenges

£20,000 per year for up to two supporters

Water: a significant contribution which would unlock a flow of new projects

£50,000 per year for up to two supporters

Fire: the highest level, symbolising passion and the spark for positive change to move at pace

£75,000 per year for one supporter

Your organisation will enjoy a range of benefits designed to enhance your corporate social responsibility profile and engage both your staff and clients.

To deepen your connection with the project, exclusive private site tours are available for your staff, clients or customers. These guided tours will showcase the impact of your support, allowing participants to witness firsthand the positive changes brought about by your contribution. We can also host meetings for your clients here. Our Fire supporter will have an acre of land on the private side named as a thank you for their dedication to restoring our natural environment.

Additionally, your support will be acknowledged through prominent signage at various locations within Heal Somerset, demonstrating your commitment to environmental stewardship.

For Wind, Water and Fire, there is a bespoke element to be explored and we have in-house expertise to ensure we make the most of such a significant partnership. We believe that your involvement at one of these three levels of partnership will not only make a significant impact upon the success of

Heal Somerset but will also contribute to the positive image and values such a partnership will generate for your organisation.

We look forward to the possibility of discussing this exciting support opportunity further and exploring how we can tailor the partnership to best meet your corporate objectives.

Thank you for considering this unique collaboration. Together, we can create a lasting impact on nature recovery in the UK.

Impact

Enhanced corporate social responsibility profile for your business and increased nature recovery in the UK.

Legacy

A safer climate future for upcoming generations with a greater abundance and diversity of nature.
